Page numbers in italics indicate photographs.

adaptations, 121–122, 129, 131–139, 141–142, 144–146
African scientists, 27, 50, 93–94, 98, 101–102, 151–152
AI, 117–118
ancestry revealed by DNA, 81–82, 147
Ardipithecus genus, 129–131
Aronson, Marc, 7
articulation, bones found in, 54, 77, 106
assumptions. *See also* observation, clarity of; scientific practices
  backyard syndrome, 23–24
  on burial customs, 80–81, 83–84
  danger of using past to explain present, 74
  patience instead of moving fast, 123–124
Australopithecus genus, 20–23, 66, 131–134, 136–137

barefoot exploration, 45
beliefs. *See* assumptions; scientific practices
Berger, Lee, *25*
  on burial customs, 77–78
  collaborations with, 7–8, 27–28, 66–68
  criticisms of, 34–35, 55, 57, 108–116, 119
  formation of exploration team, 27–30, 33–35
  Gladysvale Cave work, 98
  innovative scientific approaches, 27, 33–34, 55, 57, 108–109
  personality of, 19, 21, 71–72, 110–111
Berger, Matthew, 7, 21, 24–25, *25*, 136
bipedalism, 20
"blobs" (areas encased in plaster), 106
bones. *See* fossils; *specific body parts*
Boshoff, Pedro, 11, 13–14, *25*
brain size, 109, 120, 127–128, 142
Broom, Robert, 137
Brophy, Juliet, 57
Brunet, Michel, 128–129
burial customs, 77–84, *78*, 104–105, 120, 147

carbon-14, 75–76
Central Africa, 129
chimpanzees, 20, 79, 122, 128–130, 133, 142
chutes, *3*, 16, 48, 90, 106
Clarke, Ron, 55
classification systems for species, 20, 22–23, 65–69
"complete separation" approach, 57–62
COVID-19 pandemic, 94–96
Cradle of Humanity (East Africa), 12
Cradle of Humankind (South Africa), 12, *13*, 14, 133
critical thinking in the sciences, 117–119

Dart, Raymond, 133
Darwin, Charles, 79
dating bones, 57–62, 75–76, 144
debates about findings, 104–126. *See also* scientific practices
  analytical strategies for, 115–120
  behavioral complexity of *H. naledi*, 104–114
  facts about *H. naledi* and, 120–122
  "good science" and, 123–124
  importance of, 124–125
dental evidence. *See* jaws and jawbones; teeth
Denisovans, 81, 143–144
derived features, 131
DeSilva, Jeremy, 55, 57–58, 83
diet of tough vegetation, 131, 134–137
Dinaledi Chamber, *3*, 25, 69, 73–75, 77–84
DNA, 81–82, 143, 144, 147
Dr. Leakey and the Dawn of Man (documentary), 125
Dragon's Back, *3*, 46–48
Dubois, Eugène, 139

ear bones, inner (called "includes"), 87–88
Eaves, Lindsay, 30–31, *32*, 38, 46–47
electron spin resonance (ESR), 76
Elliott, Marina, 31, *32*, 35, 53–54, 58, 85–88, 106
equity, 27, 33–34, 50, 55, 62, 93–94, 108
evolution, timeline of, 127–147. *See also specific genus of Australopithecus, Homo, or Paranthropus*

expectations, scientific practices and, 23–24, 74, 80–81, 83–84, 123. *See also* observation, clarity of; scientific practices

fairness toward countries of archeological finds. *See* equity
Feuerriegel, Elen, 31, *32*, 58, 86–87
flowstone, 76
foot bones, 69, 143
footprints, 132
Fossil Vault (YouTube channel), 97, 119
fossils. *See also specific body parts*
  dating, 57–62, 75–76, 144
  disturbances to, 17, 57, 61, 73–74, 96–97

human violence's impact on, 61, 73–74
hypotheses for presence of, 73–75, 77–84
identification of, 56
importance of, 21, 71–72
interpretation of, 61–69
measurement of, 23–24, 56
positions of, 54, 77, 106
predators' impact on, 14, 61, 74
protection of, 37, 114–115
records of, 83–84
retrieval process for, 45–46, 106
Fuentes, Agustin, 83
Fuhlrott, Johann Carl, 146
funding for expeditions, 26–27, 39

genus classification systems, 22–23, 69
Gladysvale Cave, 98–101, 152
Gray, Tom, 20
Gurtov, Alia, 31–33, *32*, 42, 48, 58

habitat adaptations, 121–122, 129, 131–139, 141–142, 144–146
Hadar, Ethiopia, 19
Haile-Selassie, Yohannes, 130–131
hand bones, 53–54, 56, 58, *60*, 63, 69
Hawks, John, *25*, 27
hominid and hominin definitions, 20
Homo genus, 138–147. See also *Homo naledi*; *Homo sapiens*; Neanderthals
Homo naledi, *121*. *See also* Rising Star Expedition
compared to other species, 63–67, *64*, 145–146
dating of, 75–76
hypotheses for presence in Dinaledi Chamber, 73–75, 77–84
interbreeding with *Homo sapiens*, 122
naming of, 20, 22–23, 65–72
social complexity of, 104–114
Homo sapiens, 22–23, *64*, 66, 80–82, 122, 127, 140, 147
Hunter, Lindsay. *See* Eaves, Lindsay
Hunter, Rick, 14–17, *25*, 53

identification of bones, 56
If Stones Could Speak (Aronson), 7
includes (inner ear bones), 87–88
inclusivity in research, 27, 33–34, 50, 55, 62, 93–94, 108
injuries on expeditions, 15–16, 48
innovations in science, 27, 33–34, 55, 57, 108–109
inside tracks to academic recognition, 27
interbreeding, 122, 127
island dwarfism, 142

jackets (areas encased in plaster), 106
jaws and jawbones, 17, 18, 23, 52, 130–131, 133–135, 137, 144
Johannesburg, South Africa, 12, *13*
Johanson, Donald, 19–21, 34, 132

Kibii, Job, 7

Laetoli footprints, 132–133. See also *Australopithecus* genus
Leakey, Louis, 110, 125, 138
Leakey, Mary, 110, 125, 132–133, 135, 138
Leakey, Meave, 131
Leakey, Richard, 134
Lesedi Chamber, 53, 76, 82, 86, 112, 146
Linnaeus, Carl, 22
Little Foot discovery (South Africa), 55
Lomekwian tools, 107
Lucy (*Australopithecus afarensis*), 19–21, 23, 131, 132
Lucy: The Beginnings of Humankind (Johanson), 19

mandibles. *See* jaws and jawbones
Mead, John S., 5–8, *6*, 27–28, 39–40, 52, 66–68, 149, 150
measurements in fossil recovery, 23–24, 56
metacarpals, 54, 56, *60*
Molopyane, Keneiloe, 9, 88–103, *92*
advocacy for indigenous scientist education, 103, 151–152
cave work, 89–90, 93–101, 152
education, 88–89, 91–92
on "good science," 123–124
ongoing research, 152–153
Morris, Hannah, *32*, 33
Morwood, Mike, 141
Mpete, Maropeng, 94

naledi species. See *Homo naledi*
naming new species, 22–23, 65–69
National Geographic (magazine), 26, 72
National Geographic Society, 26–27
Neanderthals (*Homo neanderthalensis*), 79, 80–82, 113, 146–147
Netflix documentaries, 110–111, 113–115, 119

observation, clarity of, 23–24, 56, 84, 123. *See also* assumptions

origins of humanity, 129, 133
Orrorin tugenensis, 129

Pääbo, Svante, 81–82
palms, bones of (metacarpals), 54, 56, *60*
Paranthropus genus, 23, 134–138
peer reviews of scientific papers, 116–118
Peixotto, Becca, *32*, 33, 41–42, 48, 53–54, 58–60, 86–88
Pickford, Martin, 129
predators' impact on bones, 14, 61, 74
proteomics, 82
publication credits, 62

Ramaphosa, Cyril, 71–72
Ramsawak, Ginika, 102–103, *102*, 112
"reading" bones (interpreting meaning of), 61–69
Rising Star Expedition, *2–3*, 14–17, 37, 38, 40–41, *41*
Rising Star Workshop, 57–62
Rooyen, Dirk Van, 94

sagittal crests, 134, 135
Sahelanthropus tchadensis, 128–129
Schaaffhausen, Hermann, 146
Schoeman, Alex, 91–92
Schoetensack, Otto, 140
scientific practices. *See also* assumptions; debates about findings
  "complete separation" approach, 57–62
  critical thinking, 117–119
  equity in, 27, 33–34, 50, 55, 62, 93–94, 108
  innovations in, 26–27, 33–34, 39, 55, 57, 108–109
  observation, 23–24, 56, 84, 123
  peer reviews, 116–118
  publication credits and, 62
  teamwork. See teams and teamwork
  theory refutation and, 80–81, 83
Senut, Brigitte, 129
sexual dimorphism, 138
The Skull in the Rock (Aronson and Berger), 7
skulls, 17, 43, 45, 63, 128, 134, 135
social complexity, 77–84, 104–109, 111–114, 120–122, 141, 147
social media
  classroom use of, 8, 39–40, 44–45, 51, 52
  for hiring, 28–29
  technology for, 37, 40–45, *41*, 51
  viewer reviews on, 119–120
soil, evidence in, 43, 134
species classification systems, 23
Stone Age, 107–108
